Education

B.Sc. Biomedical Engineering Sep 2023 – Present
University of Lagos (UNILAG)
• Current CGPA: 4.59

Certificates

• Certificates 

Projects & Research

HemoSense Jul 2026 – Present
Role: Co-Founder
HemoSense is a handheld bloodtyping device prototype used for determining ABO group and Rh factors of patients having the reader and the strip
• Designed conductive electrode prototypes, progressing from graphite-based strips to copper electrodes to improve repeatability and signal consistency.
• Created a DIY customised Circuit board (PCB making) for the copper strip
• Created and printed the 3D model for HemoSense

RadTrack (Radiation Tracker) Jul 2026 – Sep 2026
Role: Hardware: electronics and 3d Printing
A low-cost prototype for monitoring scattered radiation events in areas close to diagnostic X-ray environments.
• Built a sensing and signal-processing system using a BPW34 photodiode, OPA350 operational amplifier, LM393 comparator, and ESP32-C3 microcontroller.
• Gained hands-on experience in breadboarding, circuit wiring, embedded systems, analog signal amplification,

Med-ID (Medical Identity) Jun 2026 – Present
Role: AI Engineer
Med-ID is an AI-powered Portable Health Record (PHR) prototype that allows secure, doctor's access to medical records across various healthcare facilities especially during emergency .

CodeAlpha Internship - Credit Scoring ML System Oct 2025 – Nov 2025
Role: ML Engineer
• Developed an end-to-end machine learning pipeline to compare supervised models for financial risk prediction through preprocessing, evaluation, and optimization.

NATALINK Jul 2025 – Jul 2025
Role: Computer Vision Engineer : Health Sector
• Developed an AI-powered fetal ultrasound analysis system using YOLOv8 and OpenCV for automated landmark detection and obstetric measurements.

SPARK Academy – AI in MRI (Research) Feb 2025 – Aug 2025
Role: Python Programmer / Research Trainee
• Gained hands-on experience in brain tumor analysis, multimodal MRI, and AI-based medical imaging pipelines using Python.

BeyondAI / Research Stage MLP vs KAN Comparison Sep 2024 – Jan 2025
Role: Beginner ML Engineer
• Conducted comparative deep learning research, evaluating MLP and KAN models across classification datasets and documenting reproducible findings.
• Notion Link 

Leadership & Volunteer

Welfare Secretary Aug 2026 – Present
Biomedical Engineering Student Association (BMESA) UNILAG

Alumni Member 2025 – Present
Thinking Beyond : BeyondAI

Training Team: Machine Learning Trainer Nov 2025 – Jun 2026
BMESA Hub (Biomedical Engineering Association) UNILAG, Lagos
• Supported onboarding of new members into AI/ML programs.

- Assisted in delivering introductory ML training sessions and coding workshops. - Mentored beginners on ML fundamentals, Python workflows, and project structure.	
Volunteer Member - Welfare Team Data Community UNILAG - Provided support to members during community initiatives and events. - Coordinated team activities to ensure smooth participation and engagement. - Assisted in maintaining an organized, supportive environment for all participants.	Nov 2025 – Aug 2026 UNILAG, Lagos
Tutor / Mentor Self employed - Provides academic guidance to students through one-on-one and group tutoring sessions. - Teaching students key concepts across various subjects, helping them improve performance. - Support learners with assignments, study strategies, and personalized learning plans.	Mar 2026 – Present
Assistant Team Lead SPARK Team AFIRIKAI - Coordinated workflow for a multi-member research team during MRI tumor segmentation tasks. - Managed internal deadlines and supported model experimentation during the hackathon phase. - Assisted teammates with preprocessing pipelines and experiment organization.	Feb 2025 – Aug 2025 Lagos,Nigeria

Competitions & Awards	
Winner, Prototype Inter-Departmental Engineering Challenge - PIDECE By University of Lagos Engineering Society	Aug 2026
Winner, 234 Ai Hackathon	Jun 2026
Winner, NIMECHE Innovation Competition	Aug 2025
First Runner-Up, Biodrive 2.0 & 3.0 Innovation Competition	Jul 2025
Futurize Africa Innovation Challenge Finalist	Nov 2025
Silver Medal, Departmental Chess Competition	May 2024
